

Complex Connectivity Made Simple

We simplify life and satisfy our customers with complex connectivity made simple. With low voltage simple vendor wiring solutions.

Connecting Your Tenants To The World It's What We Do Best!

Intelligent Wiring Experts

RJE TELECOM is your single source for Intelligent Wiring Solutions: Engineering Design, Central Office, Installation & Maintenance, Inside and Outside Plant, and Pathway Creation.

Our experts, with an impressive variety of telecom backgrounds, offer qualified experience for a broad range of technologies. Engineering, construction, implementation and optimization services provide a seamless, turn-key project management approach. We stake our reputation in it..

Safety & Security

When it comes to Safety & Security, shortcuts lead to trouble. RJE designs and installs high tech, reliable ...

Access Control systems for your tenants and staff. Doors and gates can be controlled remotely by access cards or key fobs, admitting authorized personnel on a timed or as needed basis. For even greater security, combine Access Control with a CCTV system

Closed Circuit Surveillance CCTV Systems provide a safe environment by deterring vandalism and other forms of crime. Visible CCTV Systems help make customers and employees feel safe. They can assist in the prosecution of criminals and aid in meeting certain insurance requirements.

In Today's World

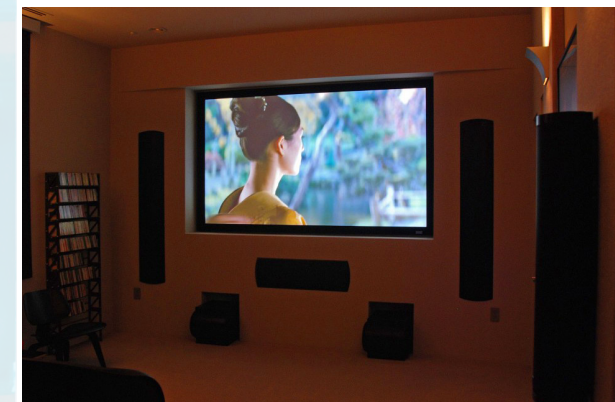

In today's world, communications bandwidth is of the most vital concern to the customer. Intelligent Wiring connects business, academic organizations and residences to the bandwidth they need, when they need it.

RJE TELECOM is a Leading Provider

of professional services to the American Telecommunications Industry. For more than two decades, we have developed a proven track record in an industry-critical area: meeting and exceeding client expectations on projects of all shapes and sizes.

Let RJE TELECOM show you how to design, build and manage all your low voltage systems.

"Our most valuable asset is our reputation with our clients."

Residential and Multi-Dwelling Units

Intelligent Home Wiring is no longer an option to residents. It is the modern day equivalent of electricity

Intelligent Wiring

Our Intelligent Wiring offers one all-encompassing solution for business, residential and MDUs, (Multi-Dwelling Units) including multimedia applications, home theaters, home audio systems, satellite TV, networking and security pre-wiring.

By providing fiber access and strategically placing multi-purpose outlets throughout the business or dwelling unit, all communication services can be conveniently utilized now and in the future without rewiring or costly renovations.

Our communication rooms are NETWORK ready for any provider to supply service to tenants without additional cabling or disruption

New Construction, Remodeling, Troubleshooting

Infrastructure for tomorrow's technology—Today! Let RJE TELECOM Consult, Advise, Design, your next custom systems to fit your customer's needs.
